

Reconsideration and withdrawal of the restriction requirement is respectfully requested. Any search of the process is certain to include a search of the apparatus used to conduct the process, and any search of the apparatus for carrying out the process is also certain to include a search of the process itself as well. Accordingly, no additional burden would be placed on the Patent Office in searching both groups together. By contrast, a very great burden will be placed on Applicants if this restriction requirement is maintained. Applicants will be subjected to twice the cost and effort in prosecuting two patent applications for an invention that should have been included in one, and will also be subjected to the continuing expense of maintaining two separate patents, whereas only one should be required to cover the full invention.

In addition, an additional burden will be placed on the public, in that the full scope of Applicants' invention will not be ascertainable from a single patent, and the public will have to find and study two separate patents to ascertain the full scope of Applicants' exclusive rights.

The great additional burden that will be placed on Applicants and the public in maintaining the restriction requirement is far greater than the slight, if any, additional burden that will be placed on the Patent Office in withdrawing the Restriction Requirement.

It is therefore respectfully requested that the Examiner withdraw the restriction requirement.
